London.

	Telegraphic Addresses:	Telephone Nos.:
Head Offices:	"SURGICAL, LONDON."	1413 PADDINGTON.
Manufactory:	"FORCEPS, LONDON."	2066 AVENUE.

[ENTERED AT STATIONERS' HALL.]

PREFACE.

IN presenting this Illustrated Catalogue of Surgical Instruments and Appliances to the Medical Profession, we take the opportunity of tendering our sincere thanks for the patronage with which we have been so long favoured, and trust by strict attention to business to merit a continuance of the same.

We have endeavoured to render this Catalogue as complete as possible; as, however, new Instruments, &c., are constantly being invented, we are unable to include everything, but shall always be happy to answer any inquiries respecting such Instruments and Appliances which are not enumerated in this List.

The number of those articles of which illustrations appear are marked with an asterisk. In order to avoid loss of time in executing orders, it is requested to carefully quote the numbers of the articles required, and, as far as possible, to copy the names as they are given.

Special care is given to fitting Artificial Limbs, Eyes, and Noses, also to Deformity Appliances, Abdominal Belts, Elastic Stockings, Trusses, &c.

Experienced Male and Female Assistants are always in attendance, or, if desired, can wait upon Patients at their own residences, whether in Town or Country.

The prices quoted in this Catalogue (in a few cases they are subject to fluctuation) have been carefully revised and made as low as possible, being specially intended for the Medical Profession, Charitable Institutions, and Hospital Patients only. Instruments and Appliances supplied to Private Patients are charged at ordinary prices.

TERMS.

Satisfactory London references required previously to opening new accounts.

Five per cent. discount allowed on all orders over £1 accompanied by remittance. No discount can be allowed on orders under £1.

Quarterly accounts net.

Special quotations for wholesale orders.

All previous Price Lists are cancelled by this Catalogue.

1901.

INDEX.

KROHNE & SESEMANN,
SURGICAL INSTRUMENT MAKERS,

DIRECTIONS FOR USE OF DR. MARTIN'S PURE RUBBER BANDAGE.

The bandage is put on the first thing in the morning, while the patient is still in bed. *It should be applied with just snugness enough not to slip down.* The moment the foot is put on the ground, the bandage becomes of precisely the proper degree of tightness, and, no matter how active the exercise or labour of the patient, it will remain in position all day. The bandage is applied by winding one turn just above the ankle, then one round the instep and sole, then up the leg, spirally, round and round, to the knee, each turn overlapping that below it, from one-half to three-quarters of an inch. If there is any redundant bandage, it can be wound round the leg below the knee, the tapes carried in different directions and firmly tied. When the patient retires at night, the bandage is to be removed and the limb wiped dry; a piece of soft old linen moistened with olive oil, or some equally simple dressing, laid on the ulcer and retained in place by a few turns of an ordinary roller. The bandage should be sponged with water (cold will do, but warm is better), and hung over a line to dry, in readiness for the morning; or it can be wiped dry at once, and rolled up *with the tapes in the centre.* Such is the dressing for the night; in the morning the leg can be washed, but, whether it is or not, all traces of oil or cerate should be carefully wiped away, as contact of any fatty matter with the bandage would tend gradually to injure the rubber.

CAUTION.

In justice, not only to Dr. H. A. Martin and his method, but to the whole Profession, Messrs. KROHNE & SESEMANN, the Sole Agents for the sale of the Martin's bandages in Europe and the Colonies, beg to caution the Profession against purchasing or recommending *Worthless Imitations*, which are largely sold, advertised as "recommended by Dr. H. A. Martin," or as "suggested by Dr. H. A. Martin," which is misleading, the vendors having not a shadow of a title to use Dr. H. A. Martin's name in connection with their bandages.

When ordering bandages through other houses than from Messrs. KROHNE AND SESEMANN, the Profession is requested to insist on being supplied with the Genuine Bandages stamped with **Dr. H. A. Martin's fac-simile Signature in carmine ink,** as shown here, as otherwise worthless imitations are likely to be substituted. Every bandage thus marked is guaranteed to be perfect and to wear well.

37, DUKE STREET, MANCHESTER SQUARE, W.
AND 152, WHITECHAPEL ROAD, E. } LONDON.

KROHNE & SESEMANN,
SURGICAL INSTRUMENT MAKERS,

818* CRÊPE VELPEAU BANDAGES.

TRADE 
MARK.

818

CRÊPE VELPEAU.

Registered.

AN ELASTIC BANDAGE CONTAINING NO INDIARUBBER.

Recommended and used by the highest Medical and Surgical Authorities for the relief of Varicose Veins, Rheumatic Gout, and other diseases of the leg; it being in many cases superior to Elastic Stockings for Varicose Veins.

In applying to any part of the body it is not necessary to fold it over as with other bandages, as it follows itself with equal uniformity around every part of the body.

It is applied for the relief of Rheumatism, Gout, Sprains, Bruises, and Fractures, and is highly recommended for keeping in position all kinds of local applications, such as poultices, ointments, liniments, &c.

These Bandages are extremely comfortable and efficacious in all cases where the tension of a rigid bandage would be unbearable, as in Diseases of the Knee, Injuries to the Head, Ophthalmia, Facial Neuralgia, &c.

For Ladies during pregnancy they are much used, and of great service in preventing undue swelling of the Legs, and effectually preventing any tendency towards Varicose Veins.

Cyclists, Teachers, and all those who suffer from Varicose Veins, or whose occupation necessitates their standing for a lengthened period, will find great relief in wearing them, especially in hot weather.

37, DUKE STREET, MANCHESTER SQUARE, W.
AND 152, WHITECHAPEL ROAD, E. LONDON.

CRÊPE VELPEAU BANDAGES possess the following special advantages:—

GREAT POROSITY and LIGHTNESS. They are remarkably light; a Bandage 2½ inches wide weighing only 1¼ ounces.

MODERATE COST. Being only about one-third the price of Rubber Bandages, Elastic Stockings, or Webs.

CLEANLINESS. They may be washed as often as required without their elastic properties being impaired.

CRÊPE VELPEAU BANDAGES are beautifully cool in wear, and such is their elasticity that they can be put to any required tension, and will follow a swelling up or down.

CRÊPE VELPEAU BANDAGES in contradistinction to Indiarubber Bandages and other similar appliances, cannot cause Rash, Itching, Ulceration, or Sweating under the Bandage.

CRÊPE VELPEAU BANDAGES contain not a particle of India-rubber—they may, therefore, be laid aside and their use resumed after any lapse of time without the fear of their perishing and becoming useless.

Sold only in three sizes, with Safety Pin. About 2, 2½ and 3 inches wide, and 2½ yards long; and will extend to equal their own length.

	2 in.	2½ in.	3 in.
Each	1/3	1/6	1/9

819 CRÊPE VELPEAU ABDOMINAL BINDERS.

An adaptation of the above, possessing all the unique properties of the Crêpe Velpeau Bandages, is used after many Abdominal Operations, and for Ladies after confinements it is especially useful, being light, strong, soft and cool, will not chafe the body, is of suitable length, ready for use, easily washable, and restores the abdomen to its normal size.

Sold in two sizes, complete with Safety Pins, about 8 inches and 11 inches wide, and 2½ yards long; and will extend to equal their own length.

	8 in.	11 in.
Each	4/6	6/6

DIRECTIONS FOR WASHING CRÊPE VELPEAU BANDAGES and BINDERS.—Wash in the ordinary way in hot soap and water and rinse in clean cold water, after which, squeeze out in the hand (in order to restore the Crêpe) and allow it to dry without stretching.

2413*	, ,, (Cholewa's)	0	2	6
2414*	,, ,, (Milligan's), silver	0	15	0

The antral tube A *is passed into the alveolar opening, the flange* B *being subsequently attached to a dental plate.* C *is a screw-plug, which is made to project sufficiently far down to enable the patient to readily grasp it between the thumb and forefinger when required to be removed, but not so far as to cause the teeth of the lower jaw to touch it when the jaws are closed. The tube is made of silver, and is gold-plated.*

D *is a silver rectangular canula, of such a size as to accurately fit the tube* A. *Its upper extremity,* E, *is perforated by three foramina.* F *is a movable platform, carrying a thick rubber washer,* f. *The distal extremity of the canula is in communication with a glass (containing the fluid for irrigation) by means of a long rubber tube. When in use the screw-plug* C *is removed; the fluid from the reservoir is sucked through the canula until a syphon action has been established. Temporary pressure is then made upon the rubber tube just at its attachment to the canula. The canula is now run up inside the antral tube, and the platform* B *raised so as to abut accurately against its flange. The patient's mouth being now closed upon the canula, the head is bent forward, and the pressure upon the rubber tube taken off. The syphon action is thus at once re-established, the irrigating fluid flowing from the reservoir into the antrum, and out through the corresponding nasal passage. In this way thorough cleansing of the cavity may be secured, and can be conducted with ease by the patient.*

2957*	**New Patent Clinical Thermometer,** The "Facilis." Easy to shake down. The trouble with all Clinical Thermometers is the difficulty most people experience in shaking down the index after use. This new Thermometer is so constructed (having two knife edge contractions, as distinctly shown in illustration, each contraction being as roomy as the bore itself, and still perfect in action) that its index can be "set" with perfect ease, with ONE or TWO simple swings, thus saving a great deal of time and labour	0	3	0
2958	**"Facilis,"** 1-minute	0	5	6
2959	,, ½-minute	0	5	6
2960	,, magnifying	0	5	6

2962	,, ,, ½-minute	0	8	6

The above prices include Cases.

2963	**Kew Certificates** ... ... each	0	1	6

Clinical Thermometers supplied in large quantities at reduced rates.

BREAKAGE OF CLINICAL THERMOMETERS.

From the nature of their construction Clinical Thermometers are exceedingly fragile, and there is considerable risk of breakage in their transmission either through the post or by any other mode of conveyance.

KROHNE & SESEMANN *use every precaution in packing, but they do not guarantee safe delivery, and can only supply them at the risk of purchasers.*

2965*	**Patent Clinical Thermometer Index Reducer** ...	0	5	6

DIRECTIONS FOR USE.

Having securely clamped the Clinical Thermometer, hold the instrument firmly in the left hand. With the index finger of the right hand rotate Thermometer, as per illustration, the same way as the hands of a watch, shown by the direction of the arrow. When the spring is found to be tightly wound, release the right hand, still holding the instrument firmly with the left, in a vertical position. When the circular motion ceases, the index of the Thermometer will be found reduced to its normal position.

INSTRUCTIONS FOR MEASUREMENTS, &c.

JACKET (in cases of slight deformity).—
Circumference at axilla.
,, waist.
,, hips.
Length from axilla to great trochanter.
In severe angular cases, circumference over apex of curve, position of same, and contour should be given; in lateral cases, a description of the case.
In all cases it should be stated if for male or female.

CERVICAL JACKETS.—Same measurements required, and circumference at neck, and length from neck to axilla.
Any part of the Jacket can in the process of manufacture be left soft.

WRY NECK.—Circumferences at neck and axilla.

	For Children ... ... 7/6 and	0	8	6
	For Weak Adults	0	10	6
	For Strong Adults ... ... 12/6 and	0	15	0

LARGIADER'S APPARATUS is an excellent means to counteract the evil effects of sitting in a bent posture; it helps getting rid of habitual bad carriage, removes accustomed crooked shoulders, and is eminently suited for educational institutions on account of its offering the means for rational gymnastic exercise.

LARGIADER'S APPARATUS can be recommended to all teachers and parents as a safe and certain medium for getting rid of bad carriage in children, and its consequent deplorable reaction on health and form of body.

There is no mechanical appliance which, with equal success, effaces those vicious tendencies of the lungs, stimulates the action of the heart, accelerates the circulation of the blood, and suppresses irregularities of nutrition such as that unrivalled and beneficial apparatus called LARGIADER'S ARM and CHEST STRENGTHENER.

Directions for use and examples of exercises sent with each apparatus

5683*	**Milk Tester**	0 2 0

This ingenious little apparatus consists of a vulcanite plate, with a raised centre, and a glass shading plate of corresponding size, on which are shown six shades of grey, which, after careful experiments, have been chosen as representing unboiled milk of different qualities, ranging from rich cream to very poor milk.
It will be found of great use in every household as a ready and effectual means of testing milk.

DIRECTIONS FOR USE.

Place a few drops of fresh milk (not boiled) on the centre of the vulcanite plate, then lay the glass shading plate, with its coloured side downward, on it, so that the transparent part covers the milk.
The milk will then assume a different shade of colour, which will correspond with one of the various shades on the glass plate, the quality being indicated by the scale on the edge of the plate.
